1. Introduction

This coursework aims to improve the understanding of website design, scripting languages by assigning the students to create an ecommerce website. It intends to create a functional ecommerce website that sells Bonsai Plants. Internal, Inline, External CSS and JavaScript have been used to modify the contents of the website.

1.1 Introduction to the project

As part of this project, create an e-commerce website for a shop selling a variety of bonsai trees. This course enables the students to demonstrate an understanding of creating a website, design their website using tools such as HTML, CSS and JavaScript. This site has 5 webpages.

Home Page, Blog Page, Product Page, Research Page, About us Page and Contact us Page. Additionally, the website features consistent navigation, usability and accessibility, and functional forms. It teaches students how to create a functional e-commerce website.

1.1 Goals and Achievements

Developing an e-commerce website is the main goal of the project. The objective of this project was to keep the site structure, accessibility and usability in mind and create a dynamic website using scripting languages such as HTML, CSS, and JavaScript. Throughout the project the importance of website structure, code formatting, and commenting was learned. The students will also gain a thorough understanding of the website building process.

1.2 Use of HTML, CSS, and JavaScript

HTML was used to provide structure to the website. The Texts, images, and the links are structures and organized using HTML. The code is well-structured, formatted using HTML tags, attributes, and proper nesting.

The website is styled with CSS for a consistent look and feel. The use of inline, internal and external CSS is well justified.

JavaScript has helped gain dynamic capabilities like form validation, and content update. The JavaScript functions are well structured and detailed to ensure code maintainability and scalability.

1.3 Verdict

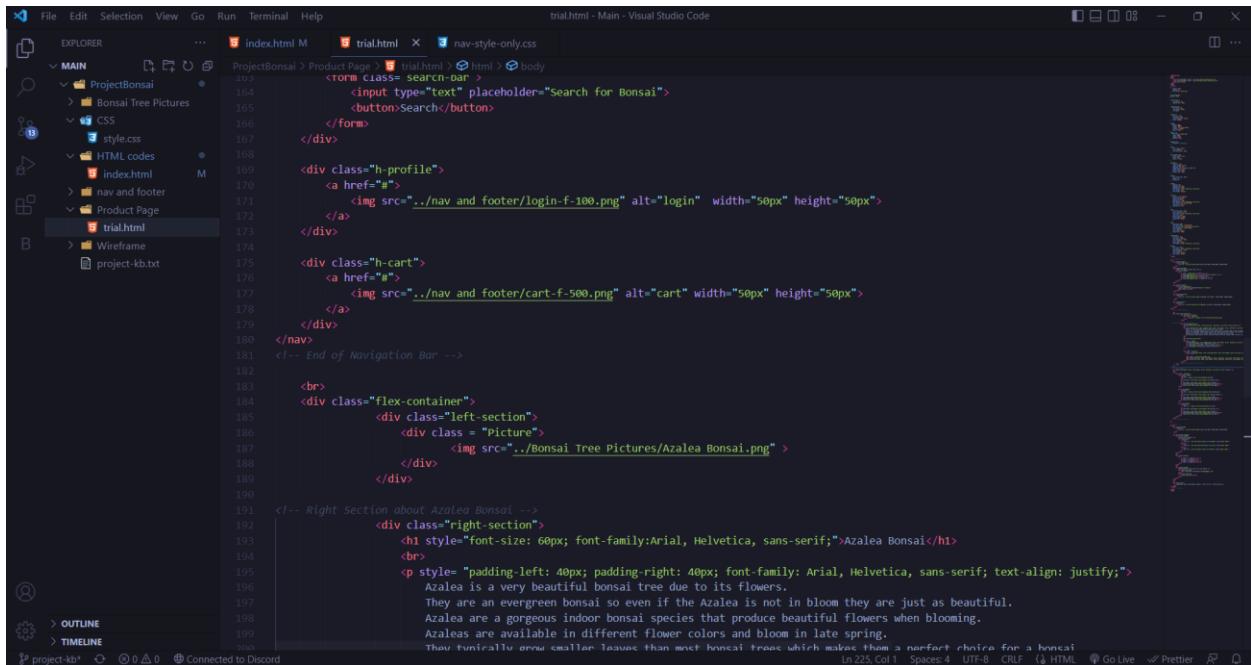

The creation of an e-commerce website served as a demonstration of their understanding of scripting languages such as HTML, CSS and JavaScript, the student demonstrated their website that is dynamic and user-friendly. This website meets all website organization, usability, and coding style standards. It helps improve the technical skills of the students by providing them an understanding of using inline, internal, and external CSS, form validation, and dynamic content modification based on JavaScript.

2. Discussion and Analysis

2.1 Use of Text Editor

Visual Studio Code is an IDE (Integrated Development Environment) that can be used to develop GUI, Web Applications, Web Apps, etc. VS Code supports 36 different programming languages such as Python, JavaScript, C++ and many more (Anshul_Agarwal, 2022).

Visual Studio Code was used as the primary text editor as it has various features and addons to assist in the completion of this project. The unique color to separate tags, attributes, text helps in identifying the work and makes it organized. The addon Live Server apply the changes on the website as soon as the codes are saved without required the page to be refreshed manually. This text editor also help in the collaborative side of work as it has a built-in git terminal in it.

The screenshot shows the Visual Studio Code interface with the following details:

- File Bar:** File, Edit, Selection, View, Go, Run, Terminal, Help.
- Title Bar:** trial.html - Main - Visual Studio Code.
- Explorer Panel (Left):**
 - MAIN folder contains ProjectBonsai, Bonsai Tree Pictures, CSS, HTML codes, Product Page, and Wireframe.
 - ProjectBonsai folder contains index.html, trial.html, and nav-style-only.css.
 - HTML codes folder contains index.html.
 - Product Page folder contains trial.html.
 - Wireframe folder contains project-kb.txt.
- Code Editor (Center):**

```

<form class="searchn-bar">
  <input type="text" placeholder="Search for Bonsai">
  <button>Search</button>
</form>

<div class="h-profile">
  <a href="#">
    
  </a>
</div>

<div class="h-cart">
  <a href="#">
    
  </a>
</div>
</nav>
<!-- End of Navigation Bar -->
<br>
<div class="flex-container">
  <div class="left-section">
    <div class = "Picture">
      
    </div>
  </div>
  <div class="right-section">
    <h1 style="font-size: 60px; font-family: Arial, Helvetica, sans-serif;">Azalea Bonsai</h1>
    <br>
    <p style="padding-left: 40px; padding-right: 40px; font-family: Arial, Helvetica, sans-serif; text-align: justify;">
      Azalea is a very beautiful bonsai tree due to its flowers.  

      They are an evergreen bonsai so even if the Azalea is not in bloom they are just as beautiful.  

      Azaleas are a gorgeous indoor bonsai species that produce beautiful flowers when blooming.  

      Azaleas are available in different flower colors and bloom in late spring.  

      They typically grow smaller leaves than most bonsai trees which makes them a perfect choice for a bonsai

2.2 Tools Used in this Coursework

- Balsamiq Wireframes – Balsamiq Wireframes is a software that helps users create wireframes in a short period of time in a sketched style. Balsamiq Wireframes was used to create wireframes for this coursework (Sokhanych, 2021). A wireframe is a black and white representation of a webpage that helps to visualize and test the different layout ideas (White, 2022).

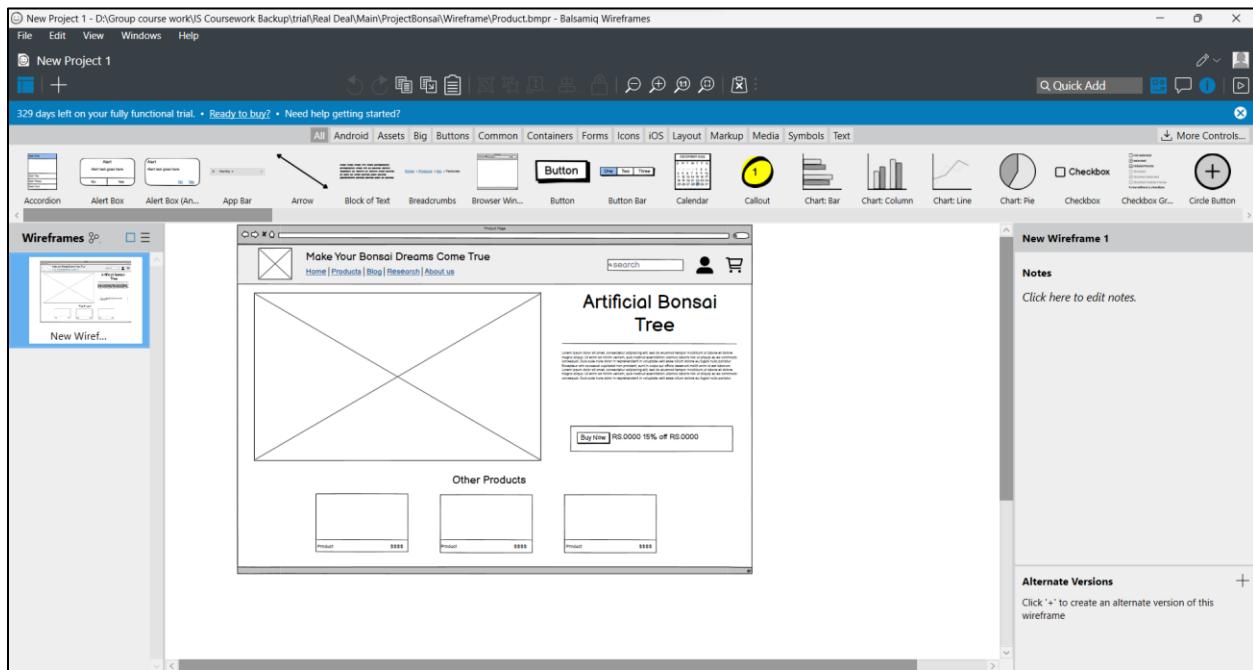

Figure 2: Balsamiq Wireframes

- Microsoft Word – Microsoft Word is a word processor developed by Microsoft that helps you create reports, documents, which was used to write this report for this Coursework (Computer Hope, 2021).
- GitHub – GitHub is a command-line tool that helps to store files of a particular project in a repository (BROWN, 2019). GitHub was used to create backups and merge our files together for this coursework.

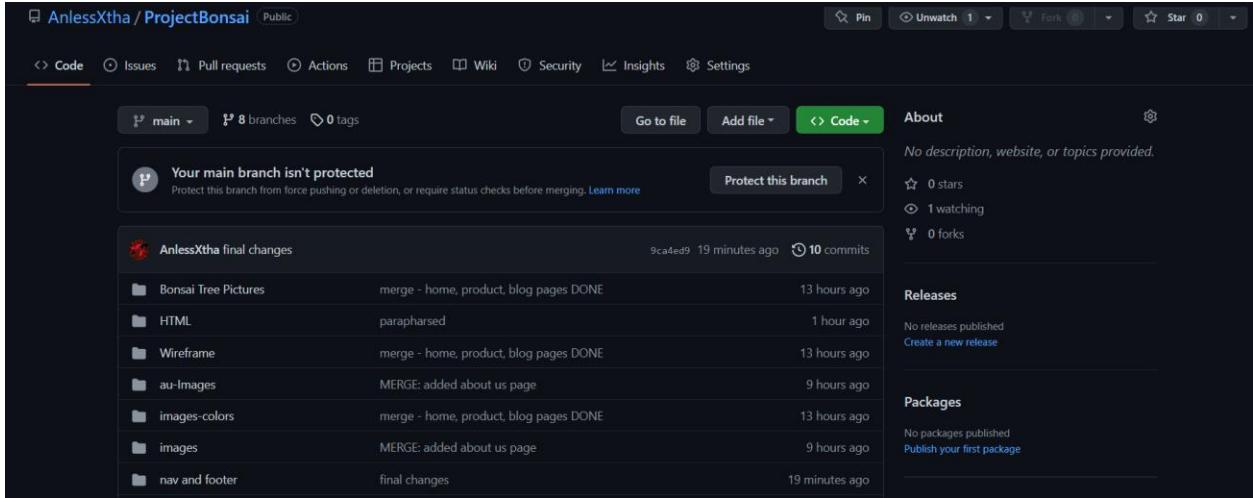

Figure 3 Github repository

- Git - Git is a mature, actively maintained open source project developed in 2005 by Linus Torvalds. Most software projects, both open source and professional rely on Git for their version control (Atlassian, 2023).

3. Description of the Webpages

3.1 Home Page

The home page contains of a short description about Bonsai Plants and a short description about the website. It also displays the trending products of the website and statements from out past customers. The navigation bar consists of Home, Products, Blog, Research, About us and Contact us that helps the customers navigate through all the other pages of the website.

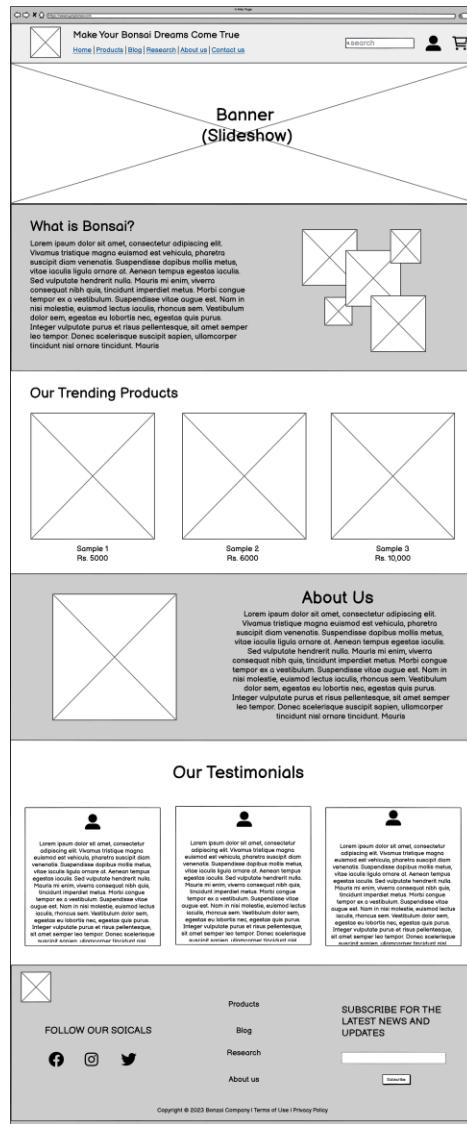

Figure 5: Wireframe of the Home Page

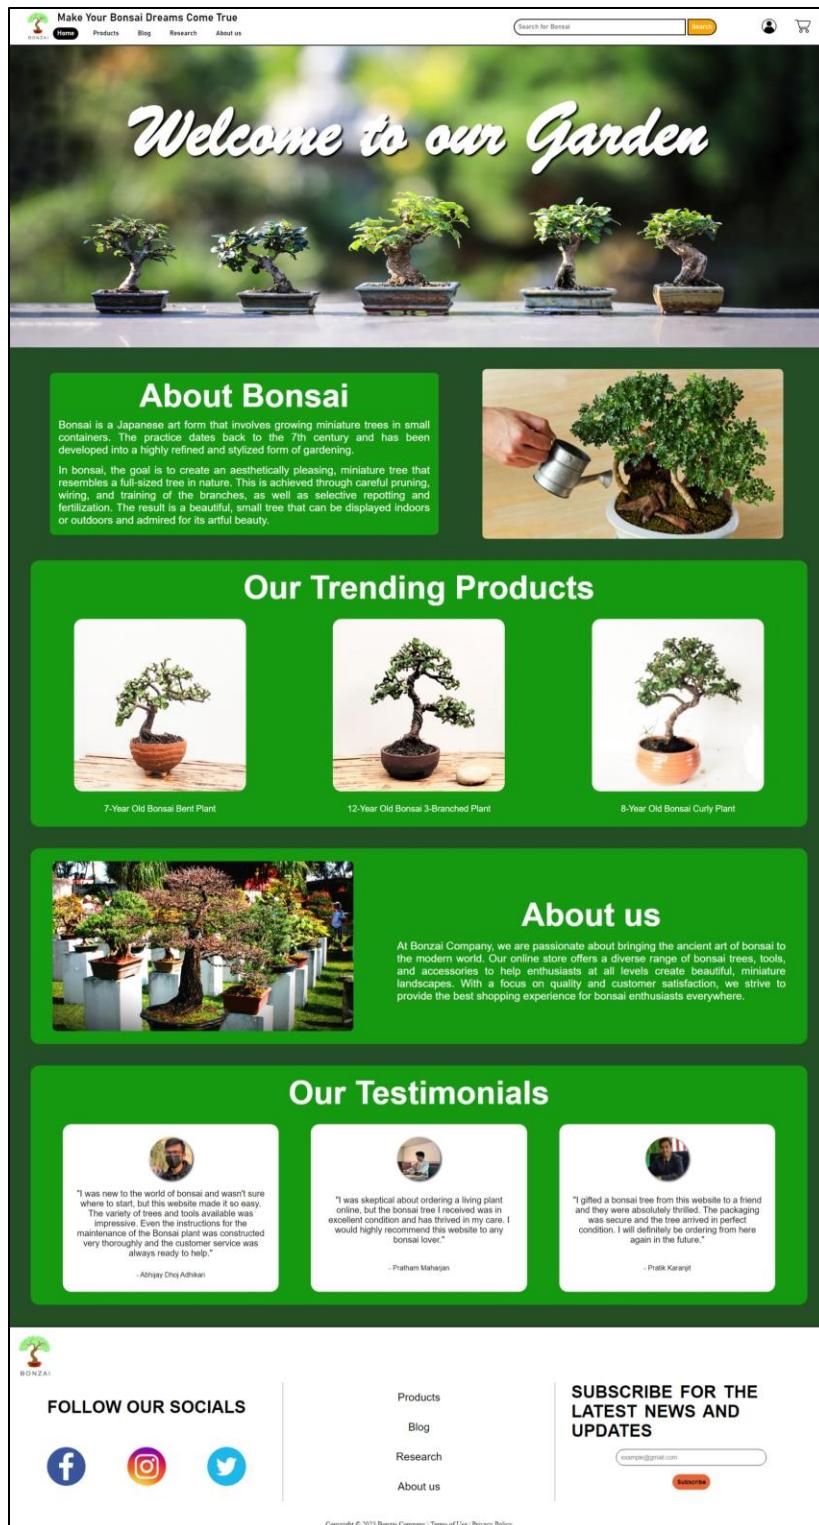

Figure 6: Screenshot of the Home Page

3.2 Product Page

The product page contains all the products that are available to purchase. The customers can click on the bonsai plant that they want to purchase which will redirect them to the sub product page where they can purchase the Bonsai Plant. A timer is present in the page by using JavaScript and it displays the countdown for the offer. When the countdown is complete the offer will end. The timer displays the countdown for every second.

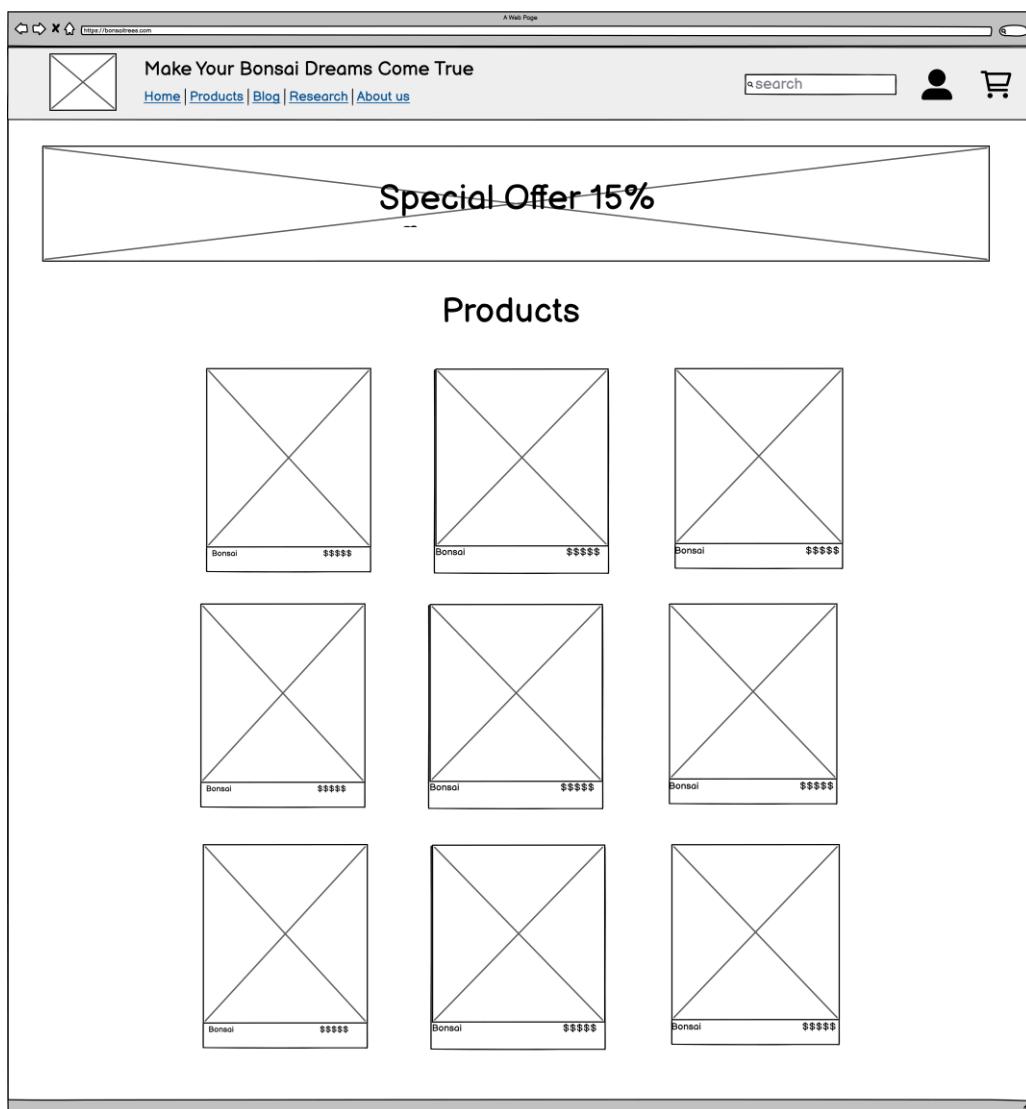

Figure 7: Wireframe of the Product Page

The screenshot shows a product page for Bonsai trees. At the top, there's a navigation bar with links for Home, Products (which is the active tab), Blog, Research, About us, and Contact us. A search bar and a shopping cart icon are also present. A prominent red banner at the top says "Special Offer 15% off." Below it, the word "Products" is centered. The page displays nine different bonsai types in a 3x3 grid:

- Azalea Bonsai**: RS.12000 - 15% off → **RS.10200**
- Dwarf Boxwood**: RS.8000 - 15% off → **RS.6800**
- Japanese Maple**: RS.0000 - 15% off → **RS.7650**
- Japanese Flowering Cherry**: RS.14000 - 15% off → **RS.12410**
- White Pine Bonsai**: RS.7800 - 15% off → **RS.6630**
- Juniper Bonsai**: RS.0400 - 15% off → **RS.7990**
- Korean Fir**: RS.8000 - 15% off → **RS.7480**
- Weeping Fig**: RS.12000 - 15% off → **RS.10880**
- White Oak Bonsai**: RS.14200 - 15% off → **RS.12070**

Below the grid, there's a section for social media links with icons for Facebook, Instagram, and Twitter. To the right, there's a "SUBSCRIBE FOR THE LATEST NEWS AND UPDATES" section with a form for email input and a "Subscribe" button.

Figure 8: Screenshot of the Product Page

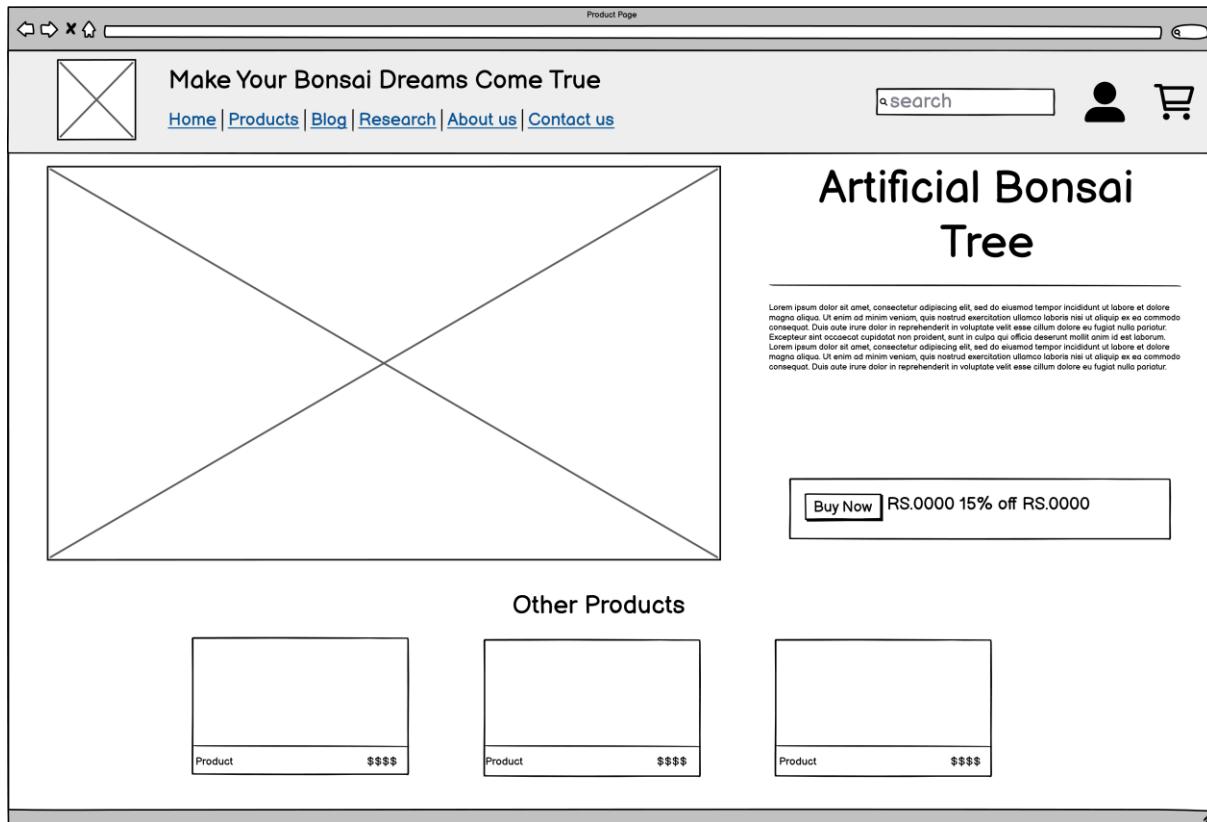

Figure 9: Wireframe of the sub-Product Page

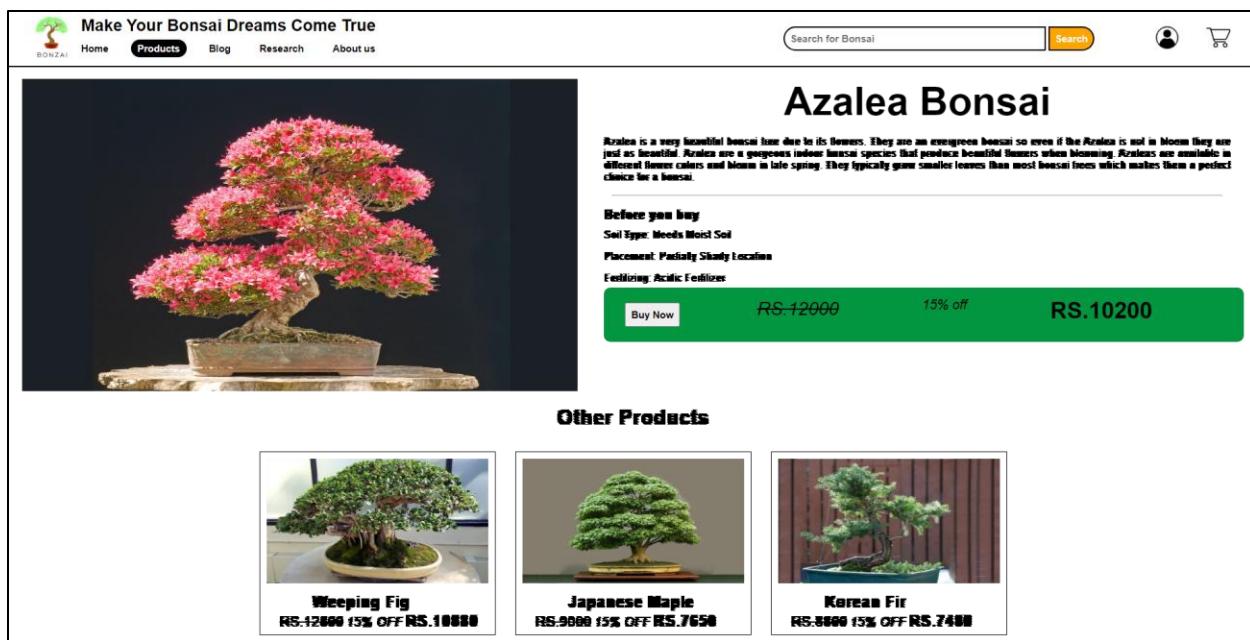

Figure 10: Screenshot of the selected sub-Product Page

3.3 Blog Page

The Blog page contains information on different topics such as About Bonsai, About Technology, Positive and Negative Impacts of Technology, etc. which the users of this webpage can read about. This page consists of a JavaScript function which displays more or less of a blog according the choice of the user. This feature is placed in every blog of this page.

Blog

What is Bonsai?

- January 27, 2023

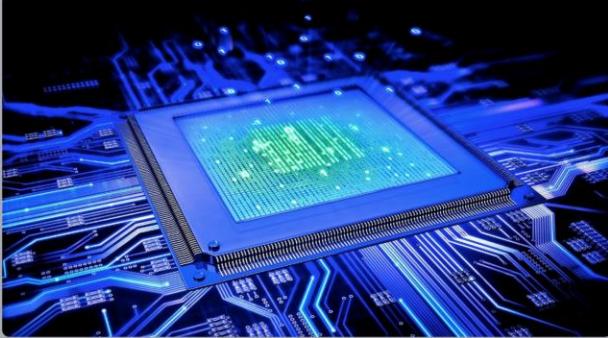

Bonsai is an ancient Japanese art form that involves cultivating miniature trees in containers. The practice of bonsai dates back over a thousand years and involves a combination of horticultural techniques, artistic expression, and spiritual practices. Bonsai trees are grown from seed or cuttings and are trained to grow into specific shapes and sizes by pruning, wiring, and controlling their environment. This process can take years or even decades to achieve, with the tree being shaped and re-shaped over time to achieve the desired result...

Today's Technology

- January 17, 2023

Today's technology has changed the way we live, work and communicate. The internet has connected people from all over the world and has made information about anything very easily accessible to everyone. Smartphones allowing us to stay connected, make calls, send messages and access the internet from anywhere at any time...

Impact of technology while selling Bonsai plants

- January 5, 2023

Technology has had a profound impact on the way bonsai plants are sold. Online marketplaces have made it easier for growers, importers and retailers to reach more customers and sell their products all over the world. This has increased accessibility for customers who may not have access to local nurseries. Also, people have been able to learn about the wonderful culture of owning a bonsai plant due to information available in the internet. The demand increases when more information is accessible to everyone...

Negative Impacts of Technology

- January 5, 2023

The rapid advancements in technology have had a significant impact on society, but there are also negative impacts. One of the most negative impacts of technology is the potential for increased social isolation and loneliness. With people spending more time on devices and less time interacting with others in person, there has been a decline in face-to-face communication skills and an increase in feelings of loneliness and disconnection...

[Read more](#)

Overall Conclusion

In conclusion, the positive impact of technology cannot be overstated. It has improved our lives in countless ways and has opened up a world of new possibilities for the future, but it is important to be mindful of its negative impacts and work to mitigate them. While technology has not only made it easier to sell bonsai plants but also conduct businesses in other sectors, it is important to use it responsibly and consider its potential impacts.

WEBSITE USED FOR COMPARISON

DARAZ
EASTERN LEAF
AWAKETECH SOLUTION
BONSAIEMPIRE
DROPBOX

Daraz

COMPARISON OF NAVIGATION BAR OF OUR WEBSITE AND DARAZ:
The navigation bar is something that provide links for the information related to that particular website. Daraz is the online shopping website and it even comes as applications in mobile phone. It is quite popular in Nepal and it is Nepalese website. Well lets get to the point and talk about the comparison of navigation bar between our website and daraz.

Similarities:
Similarities are that whenever we touch the link given in the navigation bar it gets highlighted. Another similarity is that position of the navigation bar is at the top some website put their navigation bar at the bottom of the left side for example we have google they have kept its navigation bar at the bottom. Perhaps I don't think that we have any other similarities cause any more similarities may lead to copyright.

Dissimilarities:
Now let's talk about the dissimilarities. The first dissimilarity is that Daraz has provided the language changer for the website in English and Nepali and we haven't provided the language changer. The links provided in the navigation are different. The colors used for the navigation bar are also different. Daraz has also provided the offer rate(discount%) in their navigation bar whereas we provided the offer rate(discount%) on the product page.

Eastern Leaf

COMPARISON OF PRODUCT PAGE OF OUR WEBSITE AND EASTERNLEAF:
The product page means where we keep the information or selling price of products. As I don't have much information about the origin of this website. This website is about plants. It sells almost all types of plants, gardening tools, and elements like soil and meds for the plants are also been founded. While our website is only focused on the bonsai plant. Now let's talk about the similarities and dissimilarities.

Similarities:
The first similarity is that just like us even they are giving discounts on our product. Another similarity is they even have bonsai plants in their products. otherwise, no similarities left.

Dissimilarities:
Now let's talk about the dissimilarities we have. Unlike our product page they have different kinds of plants in their products as our products are only bonsai plants and the website is also related to bonsai. They have described every product. While we have given a brief description for only one product, and for the other products we have only given the price and offer rate(discount price). They have given only a 10% discount for only some products, while we have given a 15% discount for all the products available.

Figure 14: Screenshot of the Reference Page

3.5 About us Page

The About us page contains information about the story about the origin of website, our services and the quality of the products. It also contains the information about the developers and the creators of the website. This page also grants access to the portfolio of the members which opens in a new tab.

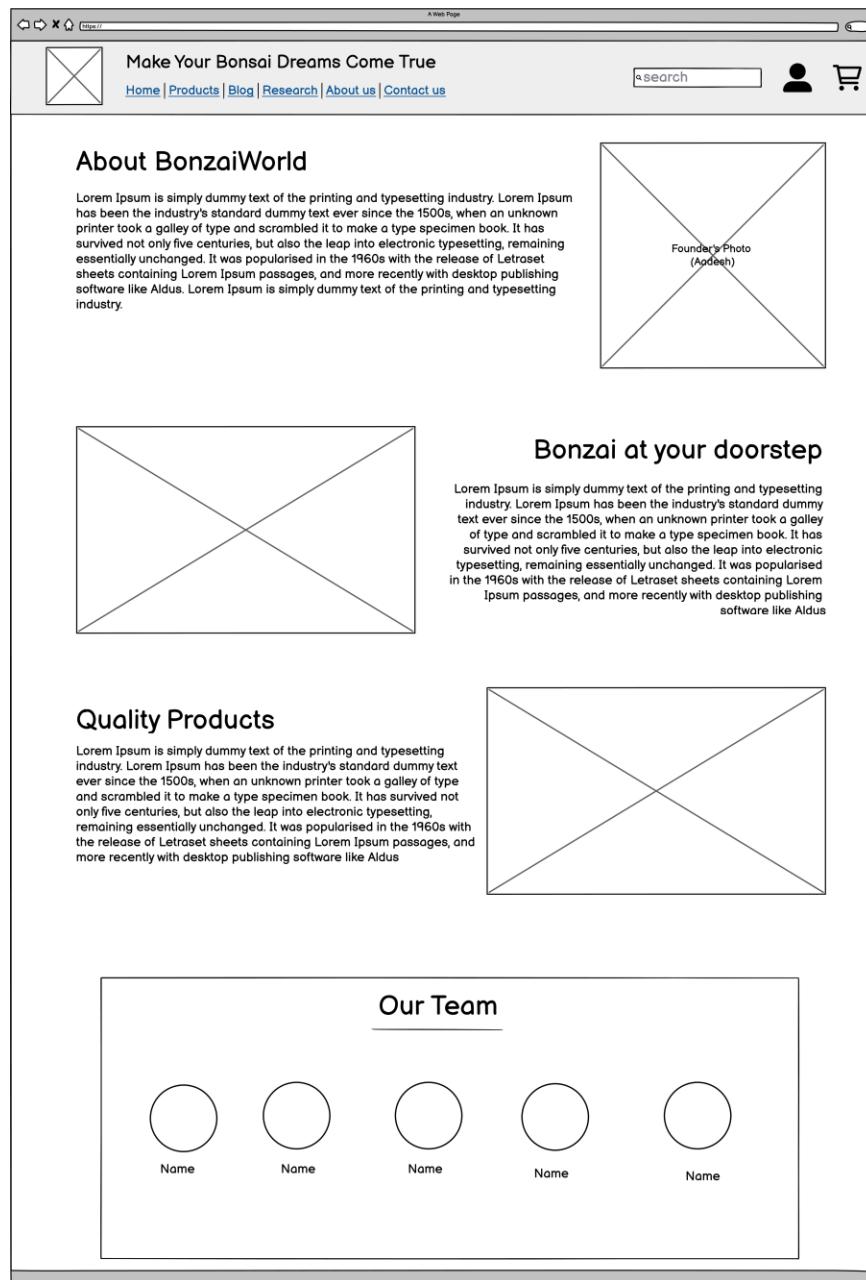

Figure 15: Wireframe of About Us page

The screenshot shows the 'About Us' section of the Bonsai World website. At the top, there is a navigation bar with links for Home, Products, Blog, Research, About us (which is highlighted in orange), and Contact us. There is also a search bar and a user icon.

About Bonsai World

Bonzai World was found by Aadesh Shrestha on 2015. Bonsai World not the first online bonsai plant shop.but still we are the largest bonsai selling e-commerce site at present. Bonsai World have delivered over 5 million Bonsai plants to more than 1 million happy customers Worldwide. There's a reason World recognize us as the largest bonsai selling site.

Bonsai at your Doorstep

Bonsai should be easy to get. Our goal is to make the world greener and make gardening easy for everyone.Each bonsai comes with easy to follow care instructions and our friendly plant doctors are on hand to hand if anything goes wrong. Our Bonsai World is easy to deliver bonsai at any corner of the world because we have more than 1000 branches in whole worldwide.

Quality products

We buy directly from reputable growers that have earned the A1 quality seal so that we can offer the finest bonsai at the most competitive pricing. We carefully cultivate and inspect each bonsai to ensure that only the best ones reach it to your door. Tell us right away if you're not completely satisfied, and we'll return your money.

Figure 16: Screenshot of About Us page

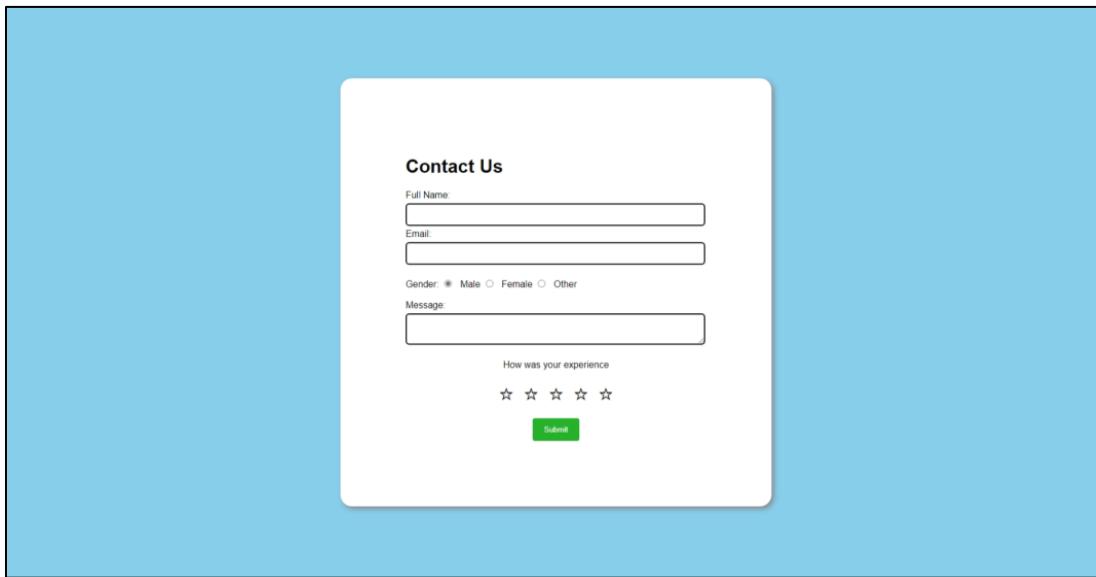

3.6 Contact us Page

The Contact us page serves as a platform for providing feedback on the service of the website and for communicating with the developers. It consists of a JavaScript function which triggers an alert message when the required input is not provided and also displays a suitable message for the user when the conditions are met.

The wireframe shows a rectangular form with a title 'Contact Us' at the top center. Below it are four input fields: 'Full Name' (with a text input box), 'Email' (with a text input box), 'Gender' (with radio buttons for Male, Female, and Other), and 'Message' (with a text input box). At the bottom, there is a question 'How was your experience' followed by five empty star icons and a 'Submit' button.

Figure 17: Wireframe of Contact us Page

The screenshot shows the same contact form as the wireframe, but with a light gray background and a white rounded rectangle containing the form elements. The 'Submit' button is highlighted with a green border.

4. Testing

4.1 Testing the hover effect of the Navigation Bar

Objective	Testing the hover effect of the Navigation Bar.
Action	<ul style="list-style-type: none"> - Product page is loaded. - The cursor is hovered over the Research section of the navigation bar.
Expected Result	When the cursor is placed on the navigation bar, the color of text must change from black to white and a black background should appear on the Navigation Bar.
Actual Result	The color of text changes from black to white and a black background appears on the Navigation Bar.
Conclusion	The test was successful.

Table 1: testing the hover effect of the Navigation Bar

Figure 19: Navigation Bar

Figure 20: Navigation Bar with hover effect

4.2 Testing the internal link of the website

Objective	Testing the internal link of the website.
Action	<ul style="list-style-type: none"> - Product page is loaded. - The “Azalea Bonsai” is clicked which is the first product of the page.
Expected Result	Product sub page must be opened in the same tab.
Actual Result	Product sub page was opened in the same tab.
Conclusion	The test was successful.

Table 2: Testing the internal link of the website

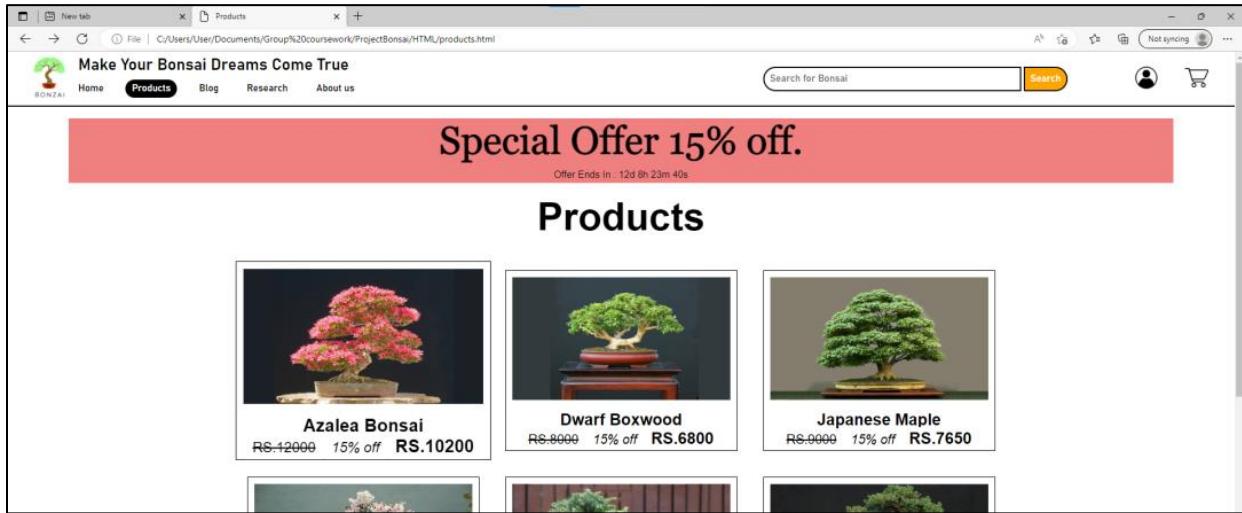

Figure 21: Testing the internal link

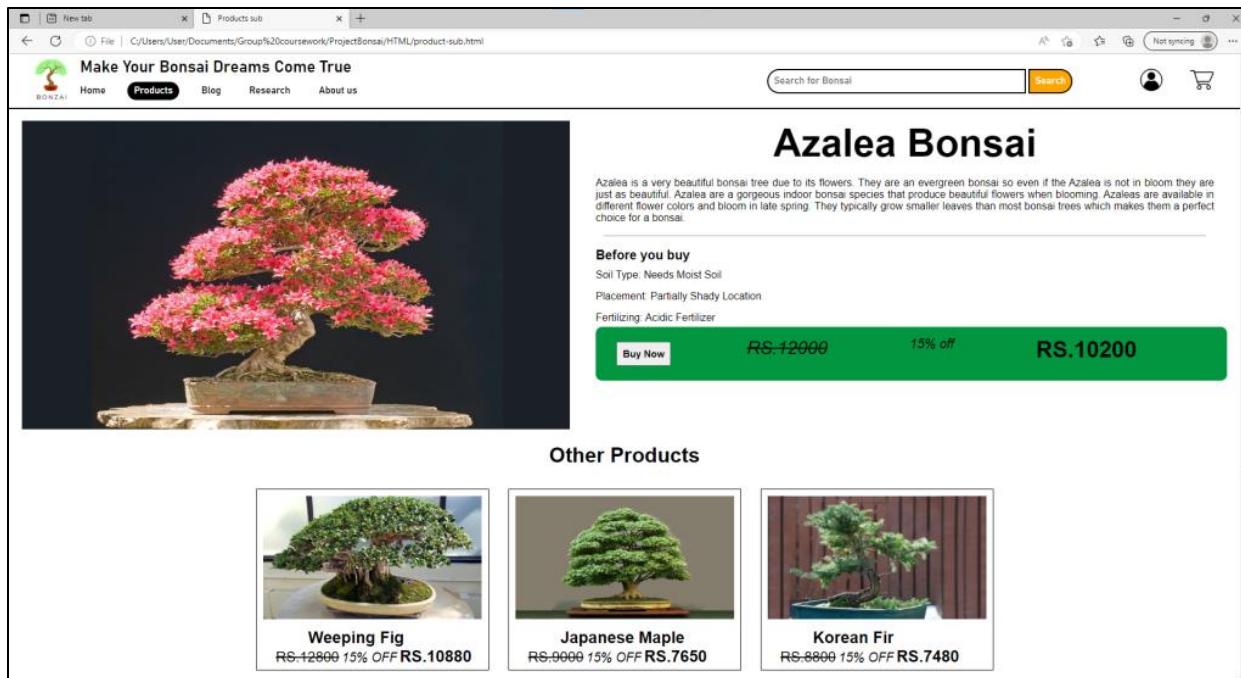

Figure 22: The internal link works

4.3 Testing the external link of the website

Objective	Testing the external link of the website.
Action	<ul style="list-style-type: none"> - Product page is loaded. - At the footer section, the icon of Facebook is clicked.
Expected Result	Clicking on the Facebook icon in the footer must open the Facebook page in another tab.
Actual Result	Facebook page was opened in another tab.
Conclusion	The test was successful.

Table 3: Testing the external link of the website

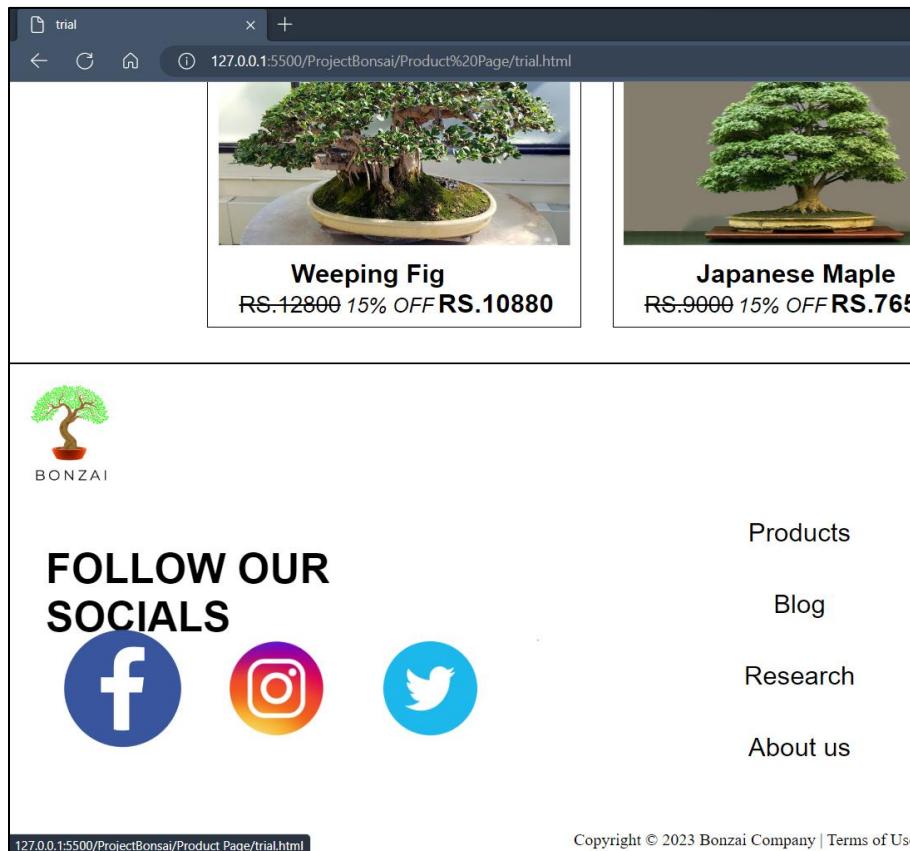

Figure 23: Testing the external link of the website

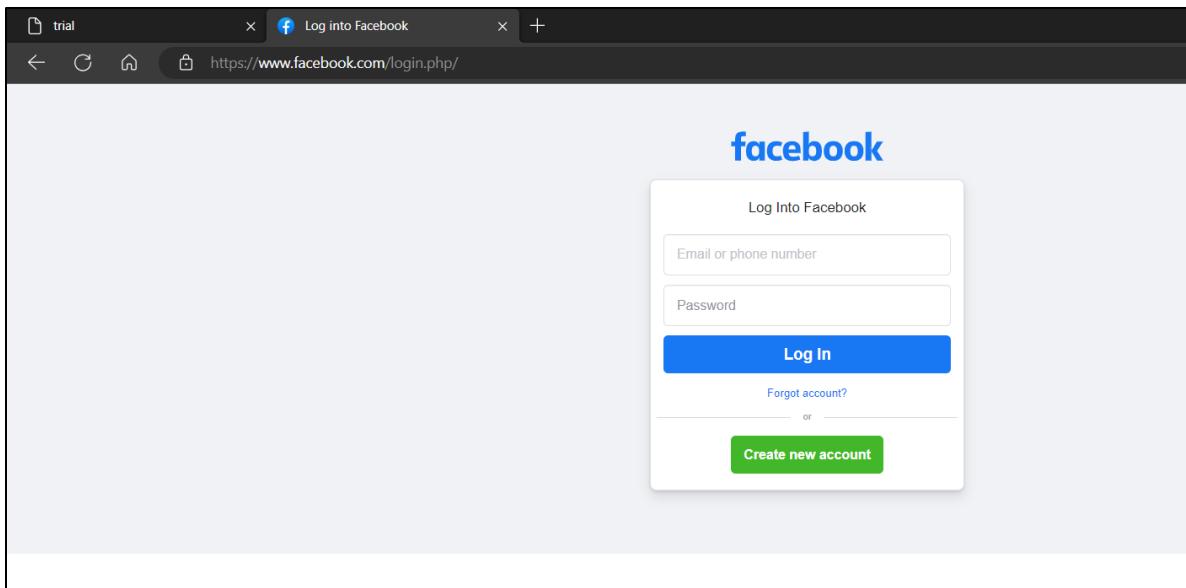

Figure 24: The external link of the website works

4.4 Testing the “Read More” button (JavaScript)

Objective	Testing the “Read More” button
Action	- Blog page is loaded. - “Read more” button of a blog is clicked.
Expected Result	The paragraph must have extended to display the entire blog.
Actual Result	The entire blog was displayed.
Conclusion	The test was successful.

Table 4: Testing the “Read More” button.

Figure 25: Testing the “Read More” button

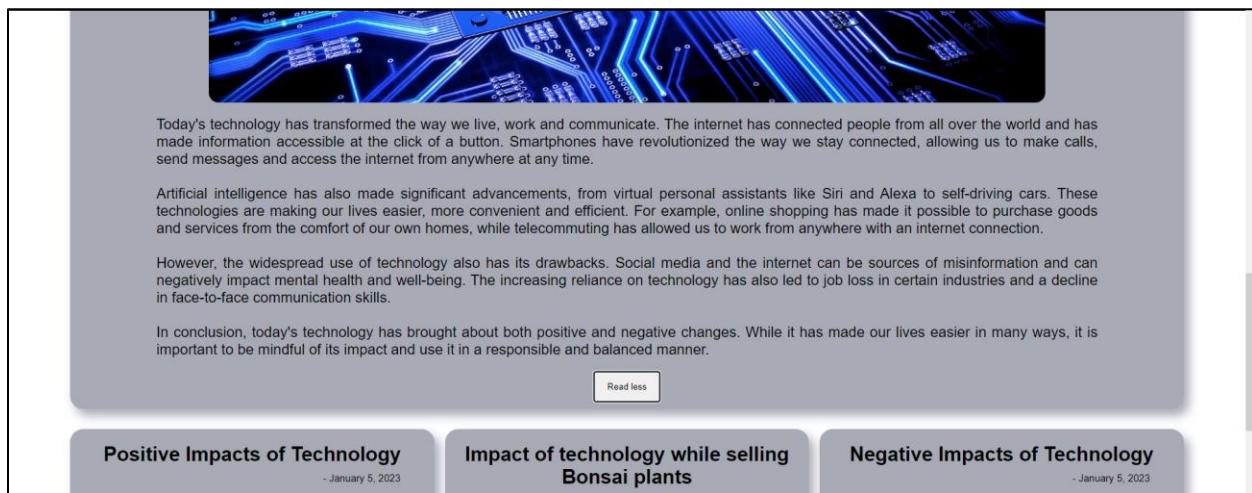

Figure 26: The “Read More” button works

4.5 Test to observe the Countdown Timer (JavaScript)

Objective	Observation of the Countdown timer.
Action	<ul style="list-style-type: none"> - Product page is loaded. - Observe the timer below the “Special Offer 15% off”
Expected Result	When the countdown ends it must display the message saying, “Offer has expired”.
Actual Result	When the timer ends it displays the message “Offer has expired”.
Conclusion	The test was successful.

Table 5: Test to observe the Countdown Timer (JavaScript)

Figure 27: Observation of the Countdown

Figure 28: the Countdown Timer Works

4.6 Test to observe the JavaScript of Form Validation

Objective	Observation of the alert message when the required fields are empty and filled.
Action	<ul style="list-style-type: none"> - The Contact us page is loaded. - All the fields are filled except for the message. - Click the submit button.
Expected Result	An alert message should be displayed stating that the message field is empty.
Actual Result	An alert message is displayed stating that the message field is empty.
Conclusion	The test was successful.

Table 6: Test to observe the JavaScript for Form Validation

The screenshot shows a 'Contact Us' form on a light blue background. At the top, a black alert box displays the message '127.0.0.1:5501 says' and 'Thank you for submitting your information!' with an 'OK' button. Below the alert, the form has a white header 'Contact Us'. It contains fields for 'Full Name' (Aadesh Shrestha) and 'Email' (aadesh.shrestha@gmail.com). Under 'Gender', there are three radio buttons: Male (selected), Female, and Other. A message box contains the text 'This is good.' Below it, a question 'How was your experience' is followed by five empty star icons. A green 'Submit' button is at the bottom.

5. Conclusion

This coursework focused on the creation of an ecommerce website that sells Bonsai Plants. The primary objective of this course work is to help students understand and apply HTML, CSS, and JavaScript, to create a functional, attractive and a user-friendly website while considering the important design elements such as user-friendliness and accessibility. It also emphasises the importance of good site organization, clean code writing and proper commenting while creating a website. The development of the wireframes was challenging but also fun at the same time as software was new to us but the aspect of deigning our website was quite exciting. Once the wireframes were completed, implementing those design to the website was more difficult than expected.

The guidelines of this project states that a careful site structure, code formatting, and comments is necessary to ensure the site's viability and scalability. Additionally, the use of JavaScript helps to dynamically alter the website's content. The outcome of this demonstrates that we have acquired the necessary skills and a solid understanding of building a website. During the course of developing this website, we ran into several technical and skill issues. The components required for building our site was difficult to find and implement so we were creative with the resources at our disposal. There was also a git bash malfunction which did not allow the codes to be pushed to the repository, but a solution was found which was to duplicate the repository in a new location.

In conclusion, we were able to put our knowledge and abilities in creation of an e-commerce website using HTML, CSS, and JavaScript. This coursework gives students a good understanding of the web development process as well as the skills needed to create a professional e-commerce website. This was a very challenging coursework especially as to working in a new team. Although there were many difficulties while executing this coursework many valuable skills like critical thinking, researching, teamwork was developed. The team was able to produce a website that is both dynamic and easy to use.

<p class="p-first">
Bonsai is a Japanese art form that involves growing miniature trees in small containers. The practice dates back to the 7th century and has been developed into a highly refined and stylized form of gardening.

</p>

<p class="p-second">
In bonsai, the goal is to create an aesthetically pleasing, miniature tree that resembles a full-sized tree in nature. This is achieved through careful pruning, wiring, and training of the branches, as well as selective repotting and fertilization. The result is a beautiful, small tree that can be displayed indoors or outdoors and admired for its artful beauty.

<h1 style="font-size: 60px; font-family: Arial, Helvetica, sans-serif;">Azalea Bonsai</h1>

<p

>

Azalea is a very beautiful bonsai tree due to its flowers.

They are an evergreen bonsai so even if the Azalea is not in bloom they are just as beautiful.

Azalea are a gorgeous indoor bonsai species that produce beautiful flowers when blooming.

Azaleas are available in different flower colors and bloom in late spring.

They typically grow smaller leaves than most bonsai trees which makes them a perfect choice for a

bonsai.

    - January 27, 2023
</p>
<div class="blog-body">
<div class="blog-img">

<div class="blog-para">

    <p>Bonsai is an ancient Japanese art form that involves cultivating miniature trees in containers. The practice of bonsai dates back over a thousand years and involves a combination of horticultural techniques, artistic expression, and spiritual practices. Bonsai trees are grown from seed or cuttings and are trained to grow into specific shapes and sizes by pruning, wiring, and controlling their environment. This process can take years or even decades to achieve, with the tree being shaped and re-shaped over time to achieve the desired result.<span id="dots1"><...></span><span id="more1">
```

The goal of bonsai is to create a miniaturized representation of a mature tree in nature, complete with a trunk, branches, foliage, and sometimes even roots and a

soil bed. To achieve this, bonsai artists must understand the natural growth

patterns of their trees, as well as the techniques required to keep them healthy and

maintain their appearance. Bonsai trees can range in size from a few inches tall to

several feet, and come in a wide variety of styles and species, each with its own

unique set of cultural and horticultural requirements. Some of the most common

species used in bonsai include pines, ficus, maples, and junipers.

Furthermore, bonsai is also an art form that is highly valued for its aesthetic

beauty. The beauty of a bonsai tree lies not just in its size and shape, but also in

the overall composition of the tree and its container,

as well as the placement and arrangement of the elements within the scene. Beyond

its aesthetic value, bonsai also has a spiritual aspect, with many practitioners

viewing it as a meditative practice and a means of connecting with nature. The care

and attention required to create and maintain a bonsai tree is seen as a way of

nurturing a living being, and the final result is seen as a symbol of the

interconnectedness of all living things.

In conclusion, bonsai is a unique and fascinating art form that combines

horticulture, art, and spirituality to create miniature representations of nature.

Whether viewed as an aesthetic object, a spiritual practice, or simply a

horticultural challenge, bonsai continues to captivate and inspire people around the

world.</p>

</article>
```

calls, send messages and access the internet from anywhere at any time.

..

Artificial intelligence has also made substantial breakthroughs, from virtual

personal assistants like Siri and Alexa to self-driving cars. These technologies

have

made our lives easier, convenient and efficient. For example, online shopping

has made it possible to purchase goods and services from the comfort of our own

homes, while telecommuting has allowed us to work remotely from anywhere with an

internet connection.

However, the widespread use of technology also has its drawbacks. Social media

can be sources of misinformation and can negatively impact mental health of a

person. The increasing dependence on technology has also led to job

loss in certain industries and a decline in interpersonal communication.

<h2>Positive Impacts of Technology</h2>

<p
    style="text-align: right; padding: 10px 50px 20px 0; font-family: Arial,
    Helvetica, sans-serif; font-size: 15px;">
```

- January 5, 2023

</p>

<div class="blog-mini-body">

<div class="blog-mini-para">

<p>Technology has had a significant impact on society and has greatly improved our daily

lives. One of the most notable positive impacts of technology is the

accessibility of information. The internet has made it possible to access vast

amounts of information from anywhere in the world at any time.

This has led to

increased knowledge and understanding.

..

Another major benefit of technology is the increase in efficiency and

productivity. Automation and digital tools have made many tasks faster and easier to complete, freeing up time for more important work.

Furthermore, technology has also made communication easier and more efficient by

connecting individuals from different parts of the world.

<div class="blog-mini">

    <h2>Impact of technology while selling Bonsai plants</h2>

    <p
        style="text-align: right; padding: 10px 50px 20px 0; font-family: Arial,
        Helvetica, sans-serif; font-size: 15px;">

        - January 5, 2023

    </p>

    <div class="blog-mini-body">

        <div class="blog-mini-para">

            <p>Technology has had a profound impact on the way bonsai
            plants are sold. Online
                marketplaces have made it easier for small gardening nurseries
                and retailers
                to reach more customers and sell their products all over the
                world.
        </div>
    </div>
</div>
```

This has increased accessibility for customers who may not have access to local

bonsai stores. Also, people have been able to learn about the wonderful culture of

owning a bonsai plant due to information available in the internet.

The demand

increases when more information is accessible to everyone.<span

id="dots4">..

However, technology has also had some negative impacts on the bonsai plant

industry. The use of digital images and videos for product promotion has led to

an increase in fraud and misinformation. This reliance on technology for plant

selection makes it difficult for customers to accurately assess the quality and

condition of the plants they are purchasing.

    <h2>Negative Impacts of Technology</h2>

    <p
        style="text-align: right; padding: 10px 50px 20px 0; font-family: Arial, Helvetica, sans-serif; font-size: 15px;">

        - January 5, 2023

    </p>

    <div class="blog-mini-body">

        <div class="blog-mini-para">

            <p>The rapid advancements in technology have had a significant impact on society, but

                not all of it has been positive. One of the main negative impacts of technology is

                the potential for increased social isolation and loneliness. With people spending

                more time on devices and less time interacting with others in person, there has been

                a decline in face-to-face communication skills and an increase in feelings of

                loneliness and disconnection.<span id="dots5">..</span><span id="more5">

                    <br>

                    <br>

```

Furthermore, its contribution to the spread of misinformation. The internet has made it easier for false information and fake

news to be spread quickly, leading to confusion and misunderstandings. This can

be especially problematic when it comes to important issues like politics and

health.

```

```
    <p>
```

In conclusion, the positive impact of technology cannot be overstated. It has improved

our lives in countless ways and has opened up a world of new possibilities for the

future, but it is important to be mindful of its negative impacts and work to mitigate

them. While technology has not only made it easier to sell bonsai plants but also

conduct businesses in other sectors, it is important to use it responsibly and consider

its potential impacts.

</div>
</a>
<h2> COMPARISION OF NAVIGATION BAR OF OUR WEBSITE AND DARAZ
:</h2>
<p> The navigation bar is something that provide links for the information related to that particular website. Daraz is the online shopping website and it even comes as applications in mobile phone. It
```

is quite popular in Nepal and it is Nepali website. Well let's get to the point and talk about the

comparison of navigation bar between our website and Daraz.

</p>

<h3>Similarities</h3>

<p>Similarities are that whenever we touch the link given in the navigation bar it gets highlighted. Another similarity is that position of the navigation bar is at the top some websites put their navigation bar at the bottom or the left side for example we have Google they have kept its navigation bar at the bottom. Perhaps I don't think that we have any other similarities because any more similarities may lead to copyright.</p>

<h3>Dissimilarities</h3>

<p>

Now let's talk about the dissimilarities: The first dissimilarity is that Daraz has provided the language changer for the website in English and Nepali and we haven't provided the language changer. The links provided in the navigation are different. The colors used for the navigation bar are also different. Daraz has also provided the offer rate(discount%) in their navigation bar whereas we provided the offer rate(discount%) on the product page.

</p>

<h1 style="text-align:left;">
Eastern Leaf </h1>

<div style="display:flex; justify-content:center; align-items:center">

```
</div>  
</a>  
<br>  
<div style="display:flex; justify-content:center; align-items:center">  
      
</div>  

## COMPARISON OF PRODUCT PAGE OF OUR WEBSITE AND EASTERNLEAF:

```

<p>

The product page means where we keep the information or selling price of products. As I don't have much information about the origin of this website. This website is about plants, it sells almost all types of plants, gardening tools, and elements like soil and meds for the plants are also been founded. While our website is only focused on the bonsai plant. Now let's talk about the similarities and dissimilarities.

</p>

Similarities

<p>

The first similarity is that just like us even they are giving discounts on our product. Another similarity is they even have bonsai plants in their products. otherwise, no similarities left.

</p>

Dissimilarities

<p>

Now let's talk about the dissimilarities we have; Unlike our product page they have different kinds of plants in their products as our products are only bonsai plants and the website is also related to bonsai. They have described every product, While we have given a brief description for only one product, and for the other products we have only given the price and offer rate(discount price). They have given only a 10% discount for only some products, while we have given a 15% discount for all the products available.

</p>

<h1 style="text-align:left;">
Awake Tech Solution</h1>

<div style="display:flex; justify-content:center; align-items:center">

</div>

<div style="display:flex; justify-content:center; align-items:center">

</div>

<h2>COMPARISON OF FOOTER OF OUR WEBSITE AND AWAKETECHSOLUTION:</h2>

<p>

First, let me tell you about the footer. The footer is the information about the website which is typically given at the bottom of the website in the form of an additional link or description and copyright notice. This website helps the person in there startup and business efficiently through digital engineering. They provide you with a team with

lots of experience. Now let's come to the point and talk about the footer of their websites and our similarities and dissimilarities.

</p>

<h3>Similarities</h3>

<p>

The similarities we have, just like every footer the format is the same as the logo and additional links about the website which is almost usual in any other website too.

</p>

<h3>Dissimilarities</h3>

<p>

The Dissimilarities we have tech solution has provided a little short description of their website in the footer while we provided all brief descriptions in our links. As we talk of links they are even available on LinkedIn, while we are only limited to Instagram, Facebook, and Twitter. In our footer, we have provided the subscription for the latest update and news for our products. While they haven't provided such a thing for any latest update instead they have provided their location(screenshot of Google Maps).

</p>

<h1 style="text-align:left;">
Bonsai Empire</h1>

<div style="display:flex; justify-content:center; align-items:center">

</div>

```
<a href="https://www.bonsaiempire.com/" target="_blank">  
    <div style="display:flex; justify-content:center; align-items:center">  
          
    </div>  
</a>
```

COMPARISION OF BLOG PAGE OF OUR WEBSITE AND BONSAI EMPIRE :

```
<p>
```

A blog page is used for the website information, opinion, and content of the website for the website visitor. unlike us, bonsai empire doesn't sell products on their website while our website is commercial for bonsai. This website provides only information about the bonsai plant while our website sells the products.

```
</p>
```

Similarites

```
<p>
```

Now let's come to the point as mentioned in the subtopic similarities of the blog pages for our as our website is about bonsai so it is a usual similarity that we have the information about bonsai plant.

```
</p>
```

Dissimilarities

```
<p>
```

Now let's talk about the dissimilarities the first dissimilarity is unlike the bonsai empire we have also given information about how present technology is making

positive, the negative impacts, and how it affects the selling of bonsai plants while the bonsai empire has only given content for the different types of bonsai plant.

</p>

<h1 style="text-align:left;">
DropBox</h1>

<div style="display:flex; justify-content:center; align-items:center">

</div>

<div style="display:flex; justify-content:center; align-items:center">

</div>

<h2>COMPARISON OF CONTACT FORM OF OUR WEBSITE AND
DROPBOX:</h2>

<p>

Contact form is available on almost all websites so the visitor can ask their queries or any other information and rate the website. Here we are going to tell you a little bit about dropbox. well, it helps us to store and share documents and data it has been also used for business purposes. Now let's talk about the similarities and dissimilarities.

</p>

<h3>Similarities</h3>

<p>

Their common similarity is that just like any other website it asks for a few details about the customer.

</p>

<h3>Dissimilarities</h3>

<p>

The first thing is that unlike dropbox we only ask for the person's name, email address, and gender or any message for us. While dropbox goes for many information like companies, countries, and even phone numbers. our contact form has even given the rating point option, while they haven't given it. The little bit more lengthy format than us to ask any queries.

</p>
